SEQ Catchments Limited

"SEQ Catchments is currently trialling the Eco-Mooring in several locations in Moreton Bay. To date, there have been no complaints with the new system and we are hopeful that ecomoorings will play a key role in the recovery of seagrass beds throughout Moreton Bay as part of our Seagrass Recovery Program. Jody Waters' customer support, enthusiasm, and practical experience has been invaluable as we've rolled out the Seagrass Recovery Program throughout South East Queensland".

Hopefully that fits the bill?

Regards,

Joel Bolzenius
