January 24, 2014

Theatrix Hawaii was recently asked by a high-end resort on the west coast of O`ahu to design and erect a large screen for a movie event. While this would normally be a routine matter, we were asked to build a stage *in the water* and to set the screen on the stage. After consideration of several ways to ensure the stability of the stage, we opted to use some helix anchors from Boat Moorings and the result was absolutely perfect. The stage was rock solid and there was never a concern that the wind or the water would affect the show. Many thanks to Dave and Boat Moorings for providing exactly what we needed.

Aloha,

Jack Hufstetler, Owner
